Microsoft Certified Technology Specialist

The new Microsoft Certified Technology Specialist (MCTS) credential highlights your skills and knowledge of Microsoft products. With this credential, you can demonstrate your expertise in configuring, managing, or developing applications for Microsoft Windows Server, Microsoft Office Technologies, Windows Technologies, SQL Server, and Windows 7.

Technology Specialist: SQL Server 2005

Overview: These specialists implement and maintain databases using specific instructions and specifications. They have thorough knowledge of the product, understand how to use the tools and Transact-SQL language, and know how to explore the user interface.

Microsoft Exam Requirement: 70-431 MS SQL Server 2005 – Implementation and Maintenance

VTEC Course: [2779](#) & [2780](#)

Technology Specialist: Microsoft Exchange Server 2007, Configuration

Overview: The Microsoft Certified Technology Specialist in Microsoft Exchange Server 2007, Configuration (MCTS: Exchange Server 2007) possesses the knowledge and skills to operate as the second tier of support between the mailbox operator and the messaging administrator. An MCTS in Exchange Server 2007 also installs, configures and administers an enterprise messaging environment that includes managing messaging security with Microsoft Exchange Server 2007.

Microsoft Exam Requirements: 70-236 Exchange Server 2007, Configuring

VTEC Courses: [5047](#) & [5051](#)

Technology Specialist: Microsoft Office SharePoint 2007, Configuration

Overview: A Microsoft Certified Technology Specialist in Microsoft Office SharePoint Server 2007, Configuration (MCTS: SharePoint 2007, Configuration) possesses a deep and broad understanding about properly configuring Microsoft Office SharePoint 2007 in a corporate environment. The qualified candidate for certification typically has a general understanding of Office SharePoint Server 2007 and how to administer Microsoft SQL Server, as well as knowledge about security and Microsoft .NET 2.0 as they relate to SharePoint Server 2007. A general understanding of configuring these technologies is also possessed: ISA Server, Windows Server 2003 Active Directory Administration, Microsoft IIS, network load-balancing for application and back-up restoration of data.

Microsoft Exam Requirements: 70-630 Microsoft Office SharePoint Server 2007, Configuring
