MCTS: Microsoft Office SharePoint Server 2007, Configuration

Overview: The Microsoft Certified Technology Specialist certifications enable professionals to target specific technologies and distinguish themselves by demonstrating in-depth knowledge and expertise in their specialized technologies.

A Microsoft Certified Technology Specialist in Microsoft Office SharePoint Server 2007, Configuration (MCTS: SharePoint Server 2007, Configuration) possesses a deep and broad understanding about properly configuring Microsoft Office SharePoint Server 2007 in a corporate environment. The qualified candidate for this exam typically has a general understanding of Office SharePoint Server 2007 and how to administer Microsoft SQL Server 2000 or 2005, as well as knowledge about security and Microsoft .NET 2.0 as they relate to SharePoint Server 2007. The candidate also possesses a general understanding of configuring these technologies: Microsoft Internet Security and Acceleration (ISA) Server, Windows Server 2003 Active Directory Administration, Microsoft Internet Information Server (IIS), network load-balancing for applications, and back-up restoration of data.
