MCTS: Windows Server 2008

Demonstrate your custom skill set and in-depth technical understanding of Windows Server 2008 by earning an MCTS certification.

Three Microsoft Certified Technology Specialist (MCTS) certifications on Windows Server 2008 demonstrate an IT professional's in-depth, current skills on Active Directory, network infrastructure, or applications infrastructure. Earn an MCTS certification so that you can be recognized for specialized technical knowledge and stand out to hiring managers as ready to excel in a Windows Server 2008 environment.

MCTS: Windows Server 2008 Active Directory Configuration

Overview: This Certification is intended for those who work with or intend to work with: Active Directory and Directory Services, Active Directory server roles, Certificate Management, or Group Policy.
